Color Customization

Customization · https://fluentcommunity.co/docs/color-customization/

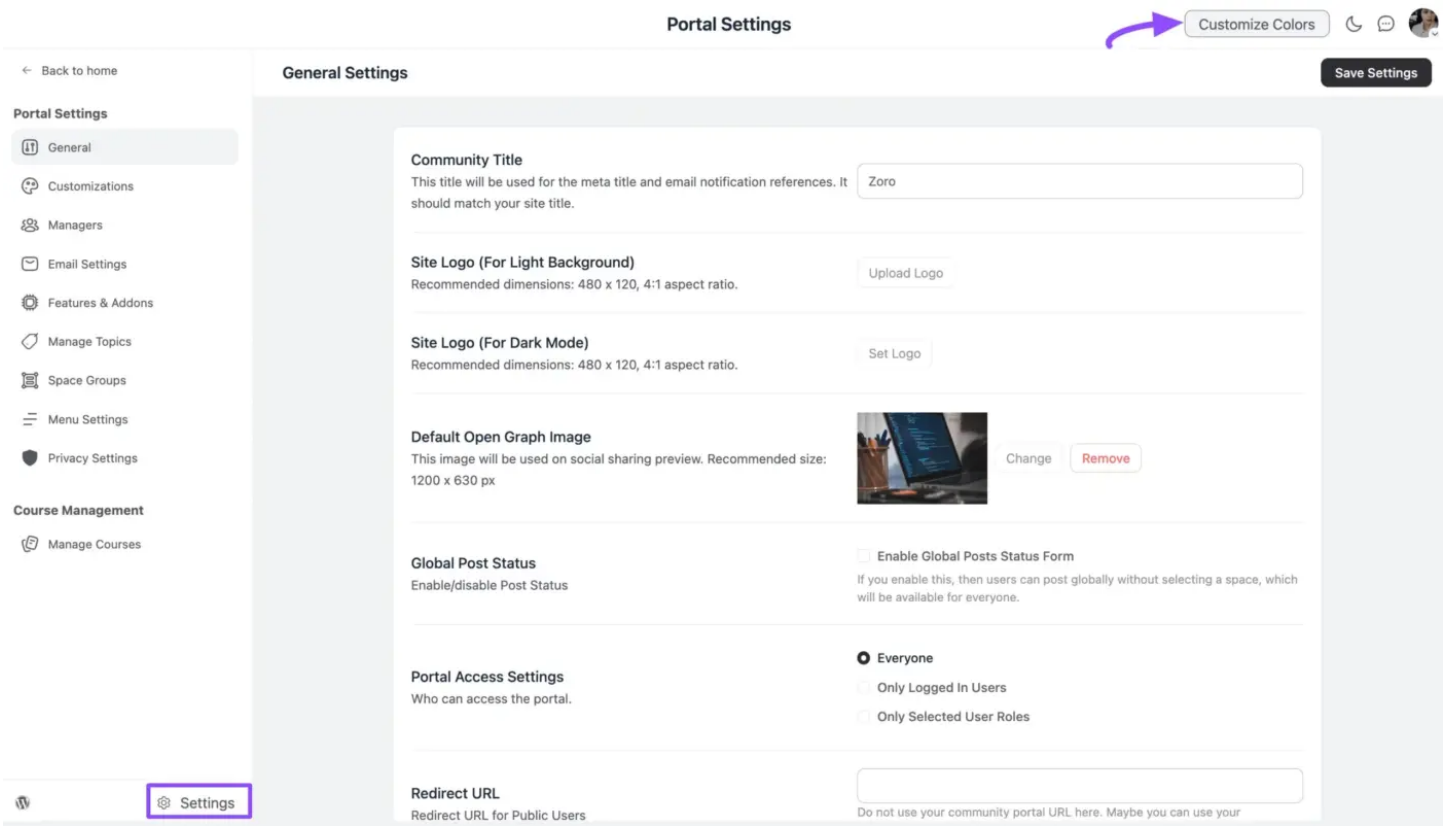

You can customize the color of almost everything in **FluentCommunity** (e.g., **Navbar**, **Sidebar**, **Feed**, **Content**, **Link**, **Text**, **Button**, etc.) according to your preferences. This article covers the detailed process of how to customize color in the overall FluentCommunity.

Color Customization in FluentCommunity

To learn how to change the default color and set a customized color in desired areas of the Fluent Community, follow the steps with screenshots below –

> **Remember**, the **Fluent Community** interface offers both **Light** and **Dark** themes, and you can **Customize** the **Colors** separately for both modes.

First, go to the **Settings** page and click the **Customize** Colors button in the top right corner.

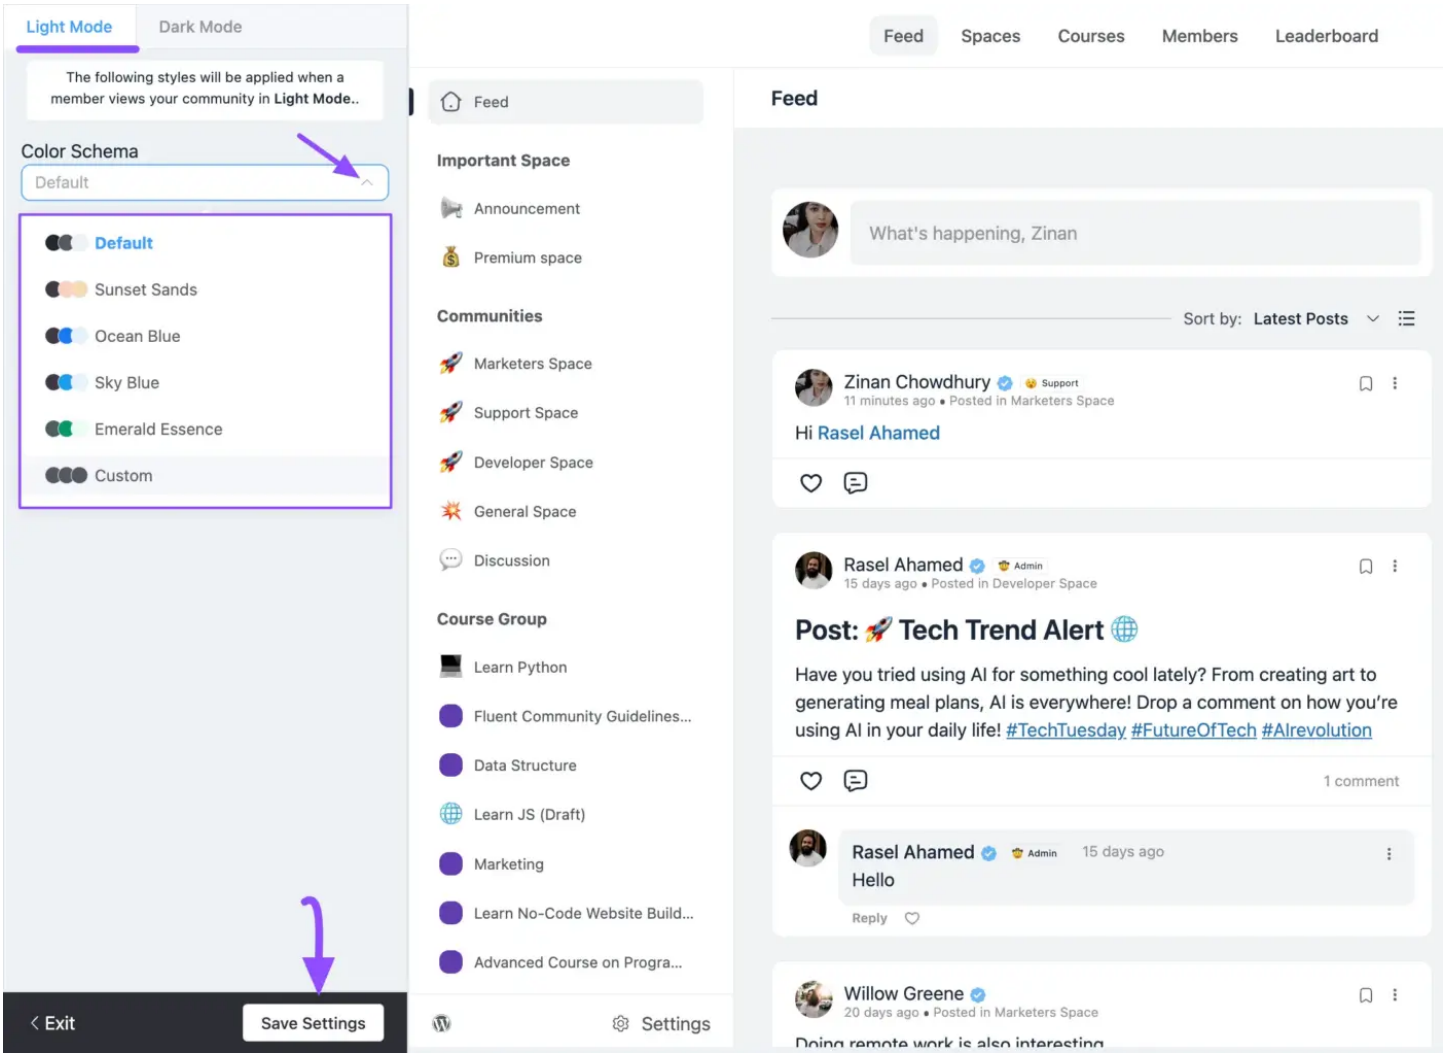

Light Mode Customization

Once you click the **Customized Colors** button, you will be redirected to the **Light Mode** tab.

To change the default color, click the **Arrow Icon** inside the **Color Schema** box, and a dropdown list with different color options will appear.

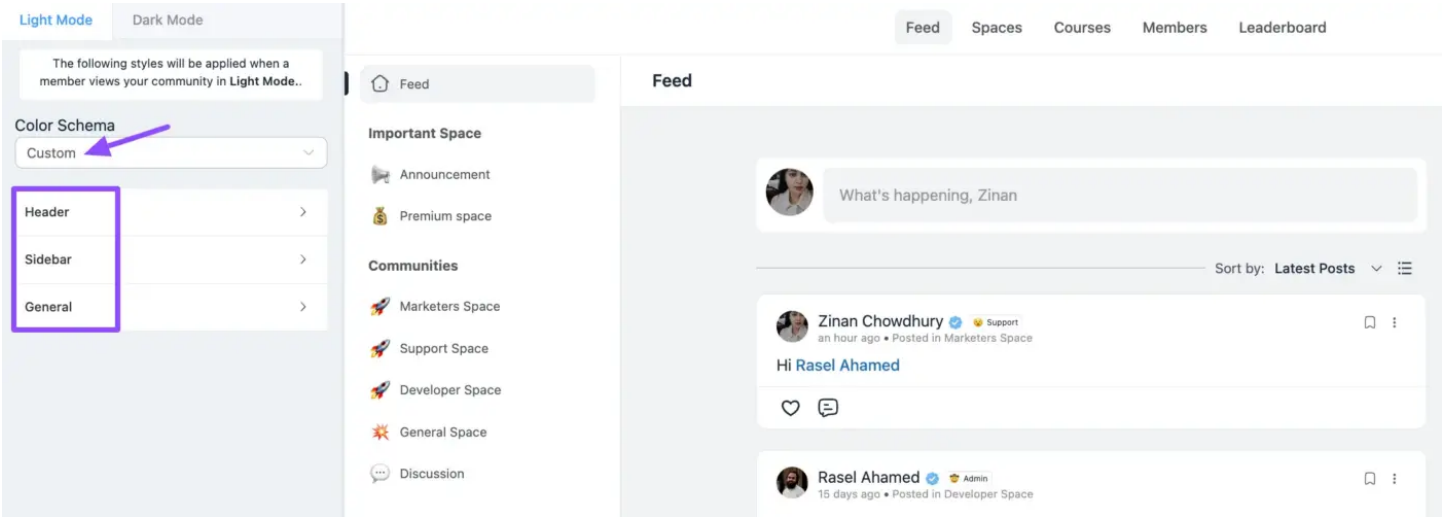

Now, you can choose any **Pre-built Color Template** or click the **Custom** option to set your own customized colors.

After completing the customization, press the **Save Settings** button to save all changes.

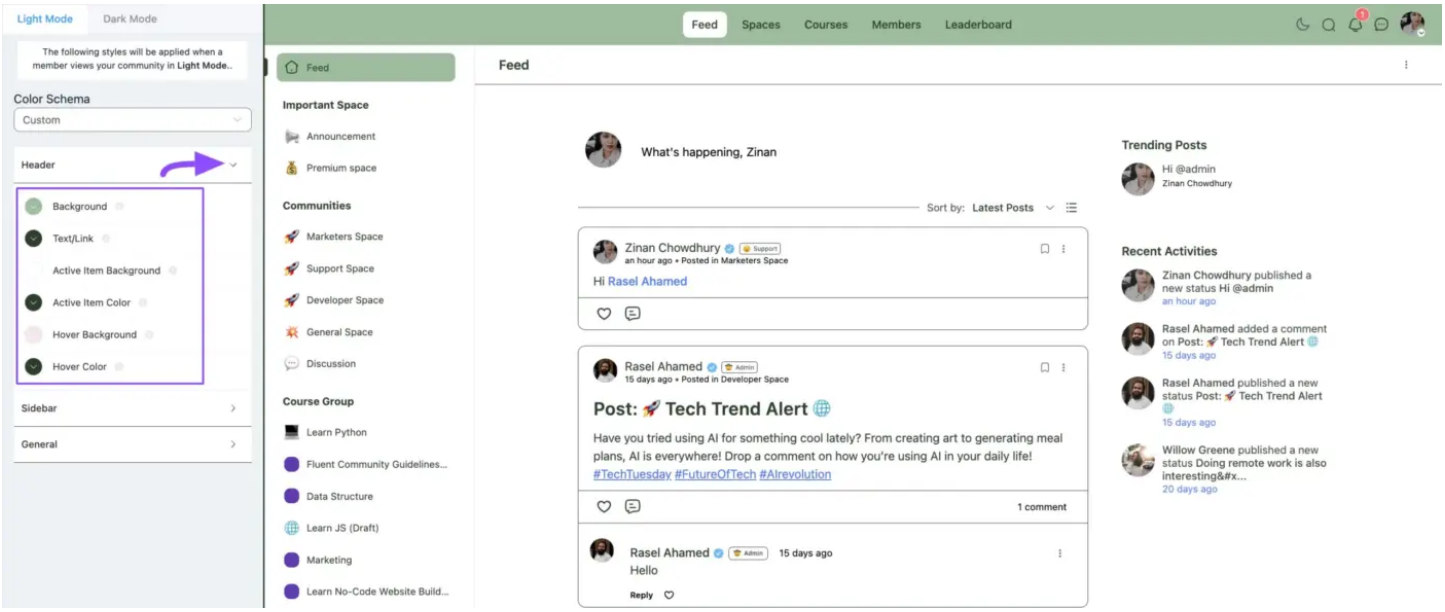

Once you choose the **Custom** option, you will get **Three Major Options** for customizing the color. These are:

1. Header
2. Sidebar
3. General

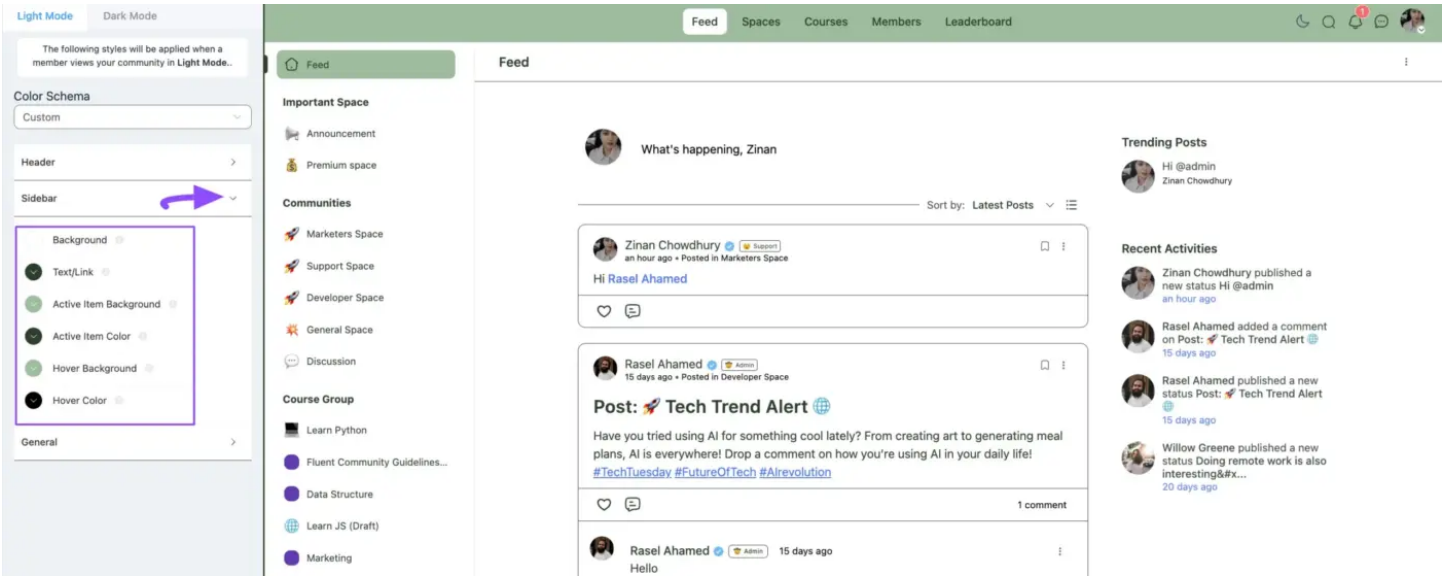

A. Header

After opening the **Header** option, you can change the color of the areas shown in the screenshot below.

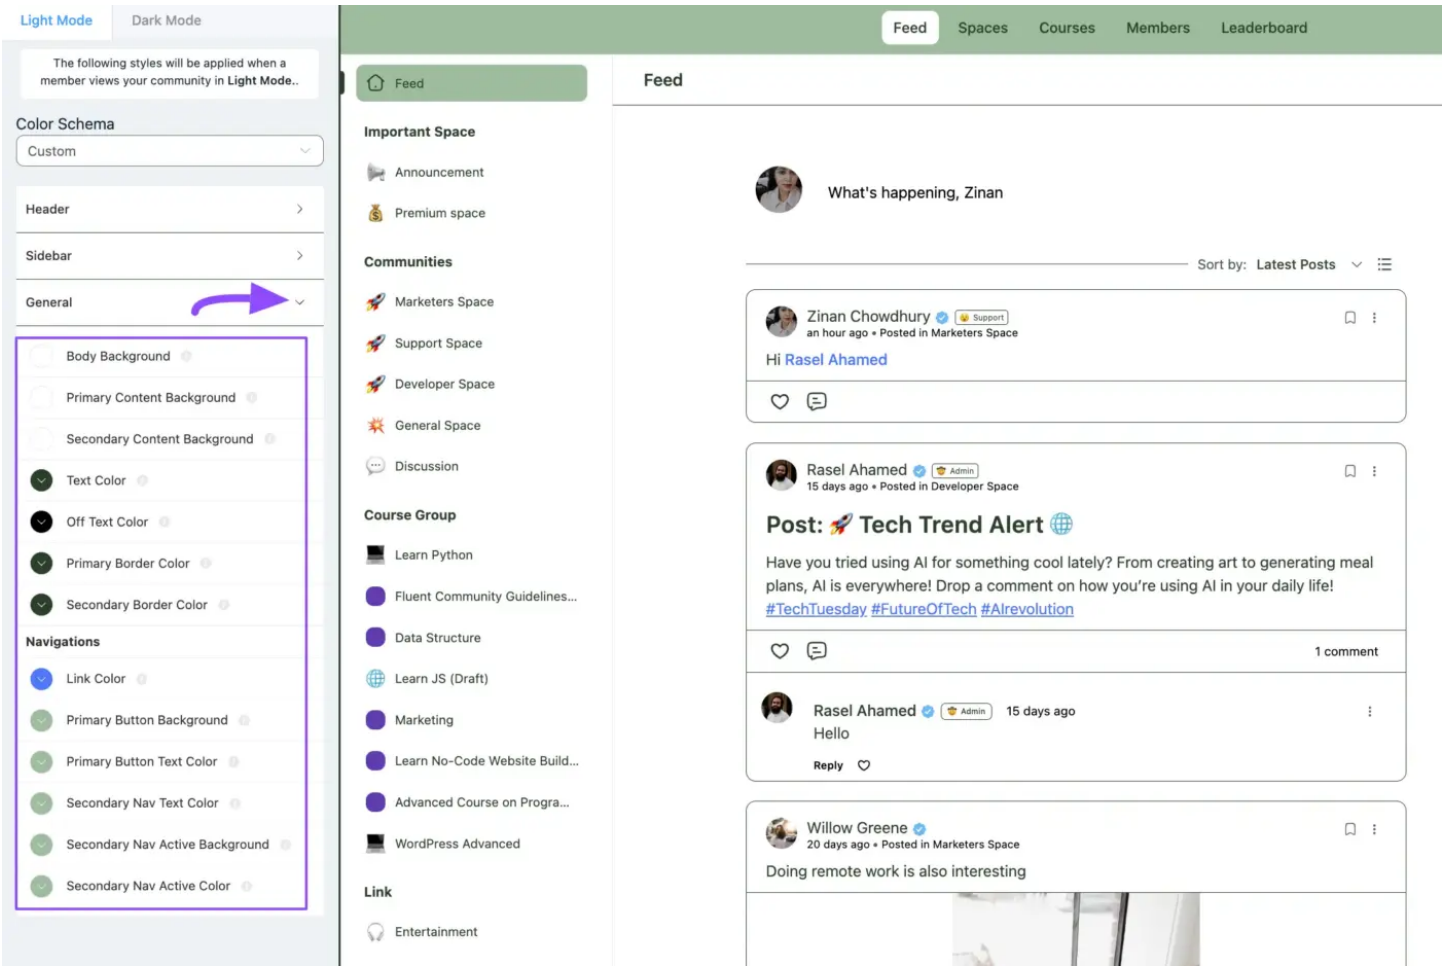

B. Sidebar

After opening the **Sidebar** option, you can change the color of the areas shown in the screenshot below.

C. General

After opening the **General** option, you can change the color of the areas shown in the screenshot below.

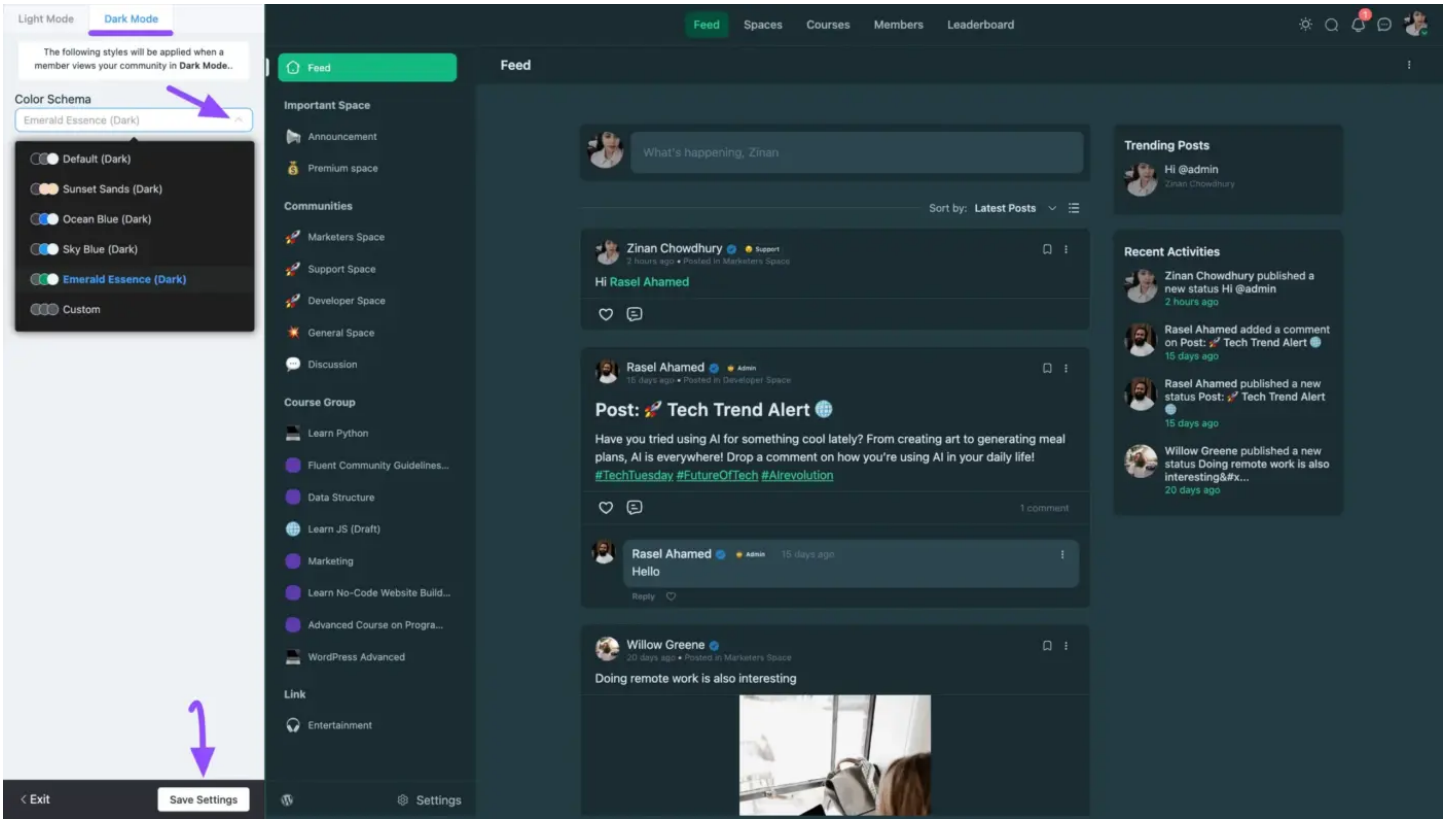

Dark Mode Customization

After clicking the **Customized Colors** button, go to the **Drak Mode** tab.

> Then, follow the same process shown above as the **Color Customization** for **Dark Mode** is exactly similar to the **Light Mode.**

After completing the customization, press the **Save Settings** button to save all changes.
