Menu Settings

Administration · https://fluentcommunity.co/docs/menu-settings/

FluentCommunity provides the flexibility to customize your menus, allowing you to organize both the sidebar and top menus. You can easily enable, disable, or reorganize menu items based on your community's needs.

Access Menu Settings

Start customizing your menus, go to **Settings**, then select **Menu Settings** from the left sidebar. Here, you can manage each menu section.

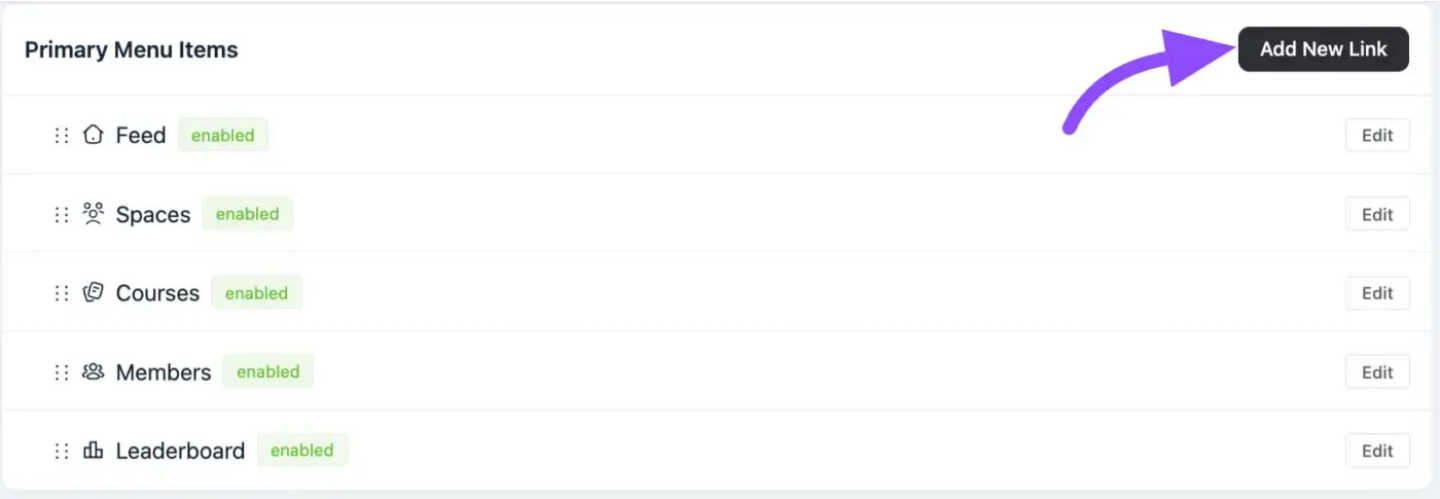

Customize Menus

There are four key menu sections available in FluentCommunity:

Primary Menu Items

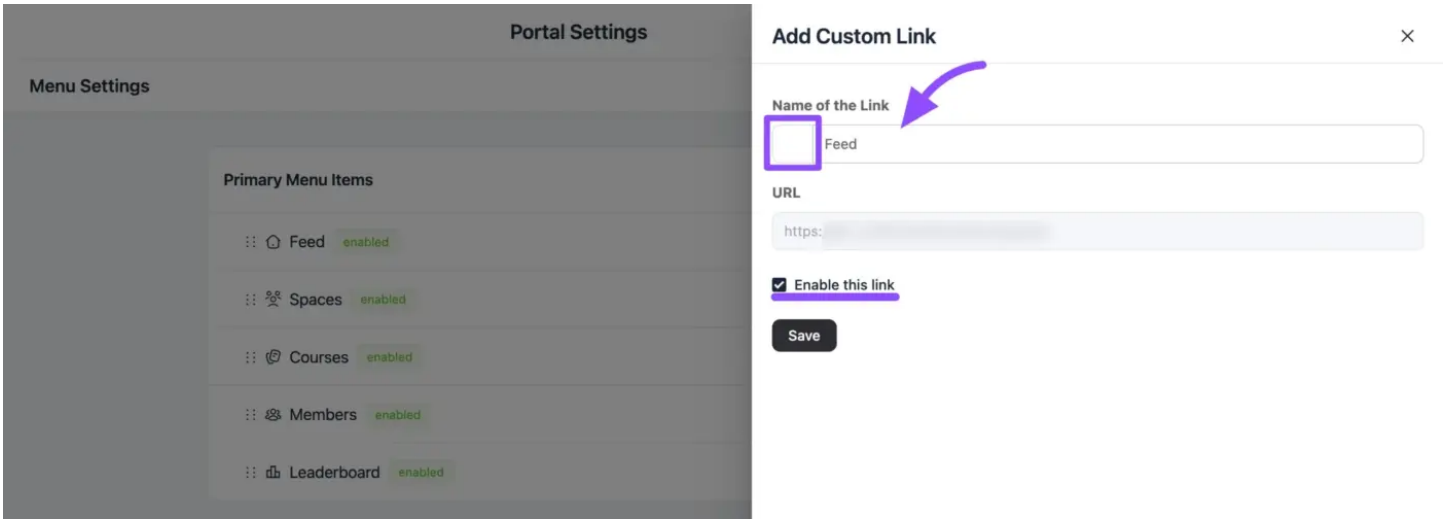

These are the items in the top menu of your FluentCommunity Plugin. You can add any custom link here by clicking on the **Add Link** button.

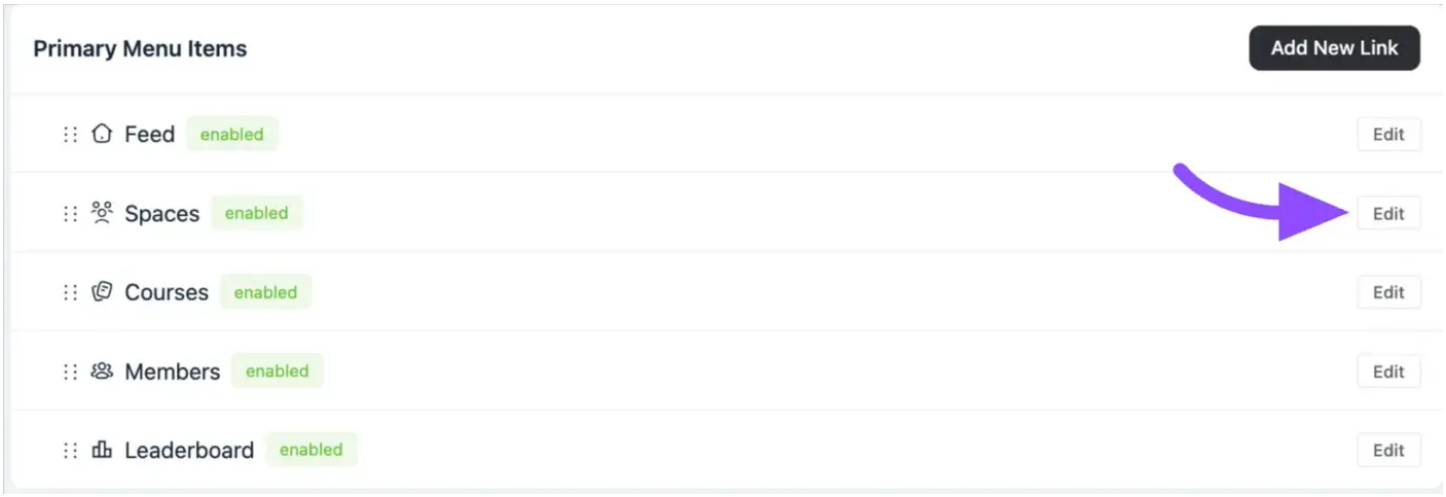

A Pop-up will arrive here from where you can give the details for your external link. Click on the **Square** space before the name field to add any **Emoji** with your custom Link.

Now give a name for your link in the **Name field** then put the URL in the dedicated field. Now Check the **Enable this link** checkbox to enable the link.

Lastly, click on the **Save** button to save the link and show it in your top menu.

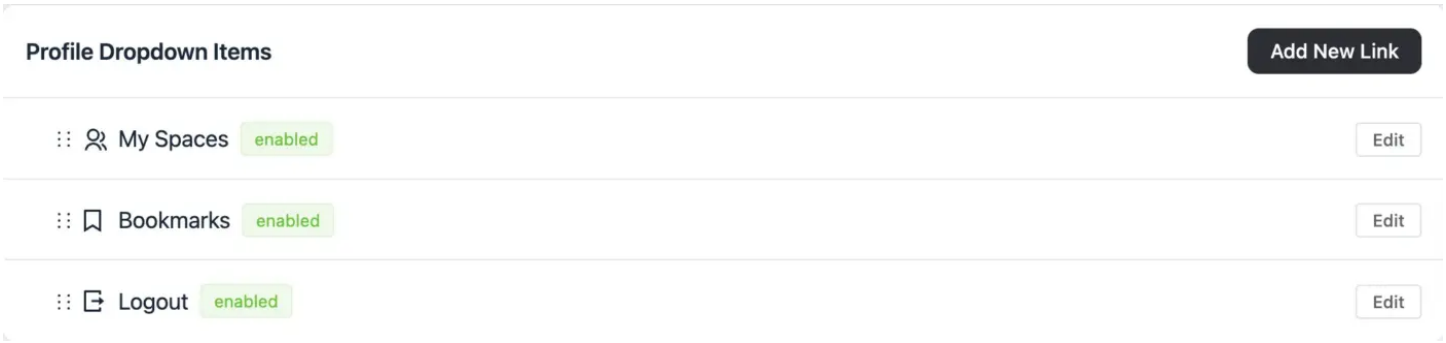

If you want to edit any menu link just click on the **Edit** button next to the **Menu Item** names.

Profile Drop-down Items

These items appear in the user's profile dropdown menu, providing easy access to custom links. In the same way, you can also link the custom links here.

Top Links (At Sidebar)

This section displays custom links at the top of the sidebar, making it a prime spot for important or frequently accessed links. If you want to add any link to this section just click on the **Add New Link** button.

A pop-up will appear to give detailed information about the link. Then click on the **Save** button to save your link.

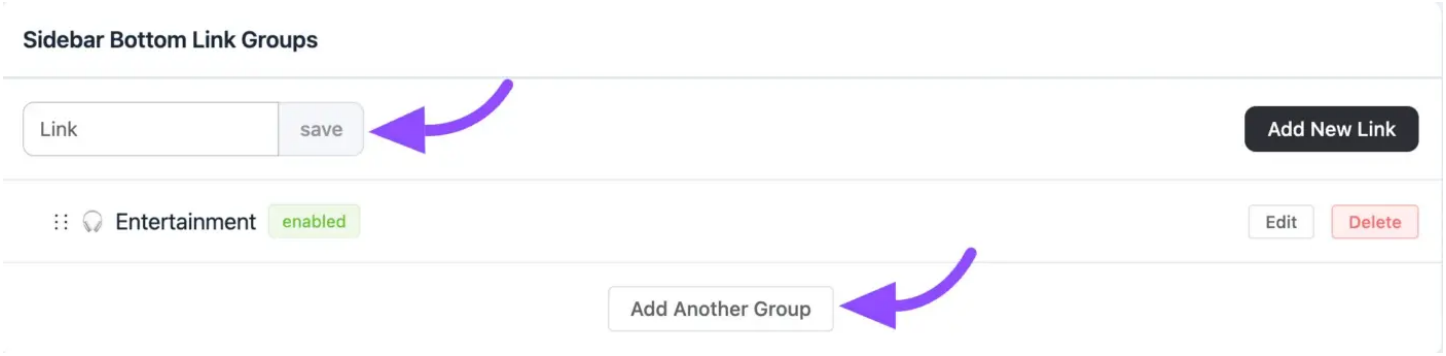

Bottom Links (At Sidebar)

Links are displayed at the bottom of the page on the left sidebar. Links in this section can be grouped for better organization.

To organize links, you can create a new group by typing a **Group Name** in the text field and clicking **Save**. Once a group is created, click **Add New Link** within the group. Enter link details and click **Save** to include it.

To change or remove links in this section, use the **Edit** or **Delete** buttons next to each link name.

If you want to add another group click on the **Add Another Group** button placed down here.

Organizing Menu Items

Drag-and-Drop

You can arrange items in each section by dragging and dropping them into the desired order.

This flexibility helps ensure that your community's menus are tailored to your preferences, making navigation intuitive for members.

To add an installable app shortcut to the sidebar, see Progressive Web App (PWA) (Pro).
