Social Links Customization

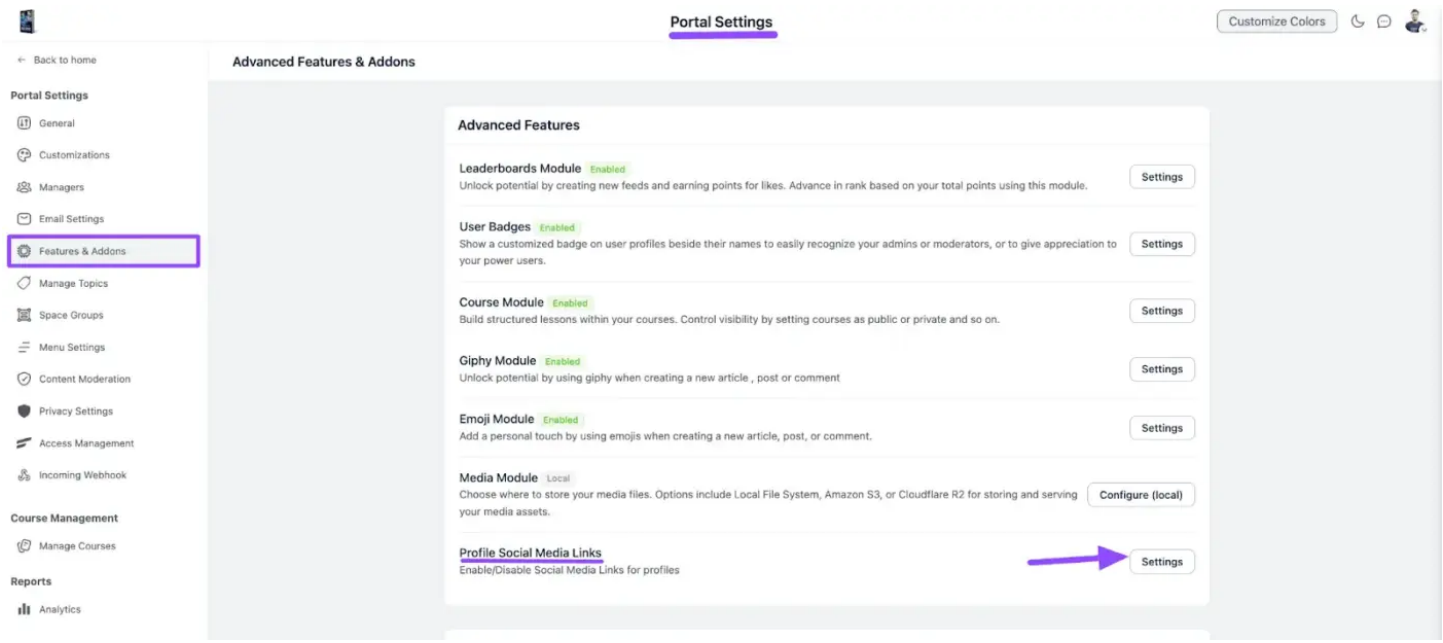

Member Management · https://fluentcommunity.co/docs/social-links-customization/

FluentCommunity's Social Links Customization feature allows **admins** to control which social platforms users can add to their profiles. It also enables users to easily manage their social links, increasing engagement and connectivity within the community.

This guide will walk you through setting up and customizing social links on user profiles.

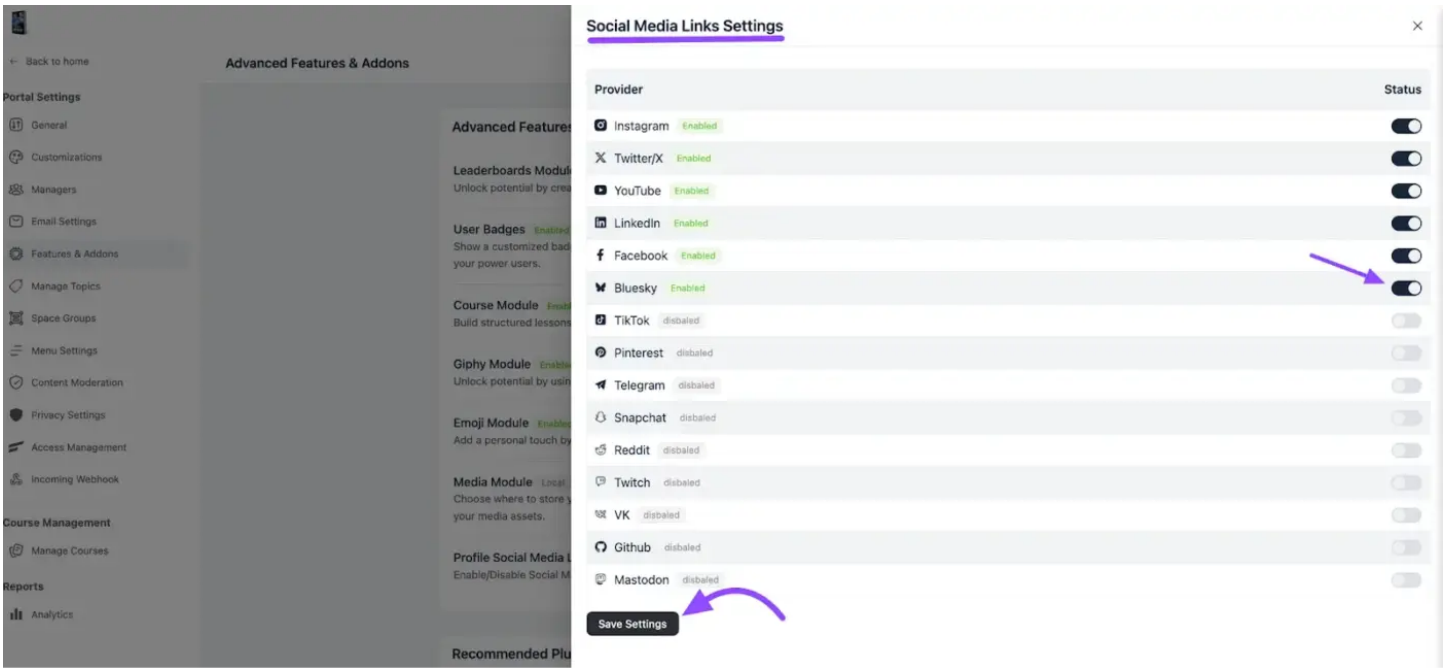

Enable Profile Social Media Links

To enable social media links in your profile, go to the Portal Settings and select the **Feature & Addons** section from the left sidebar. Then, locate the **Profile Social Media Links** section and click the **Settings** button.

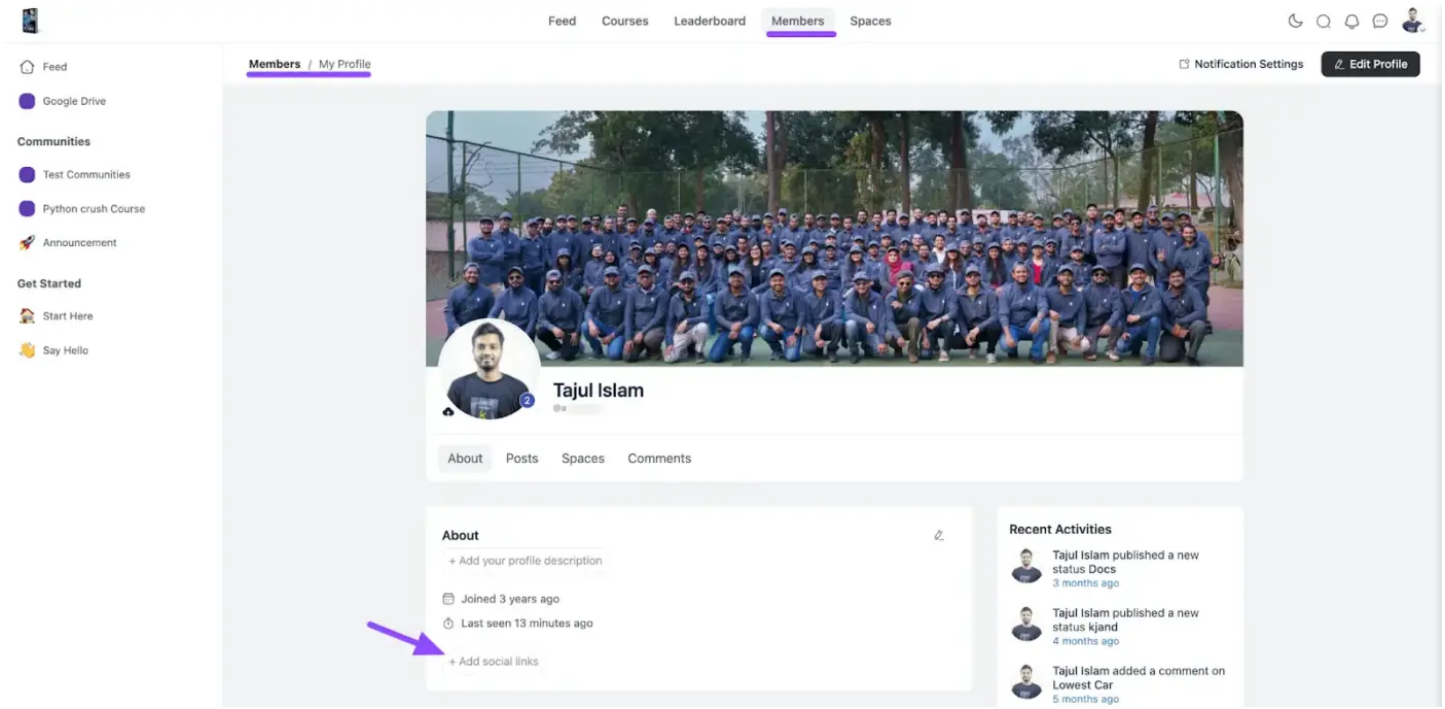

Social media links settings

Here, you'll see a list of supported social media platforms. Toggle each platform **on** or **off** to control which links users can add to their profiles. After that, click the **Save Settings** button.

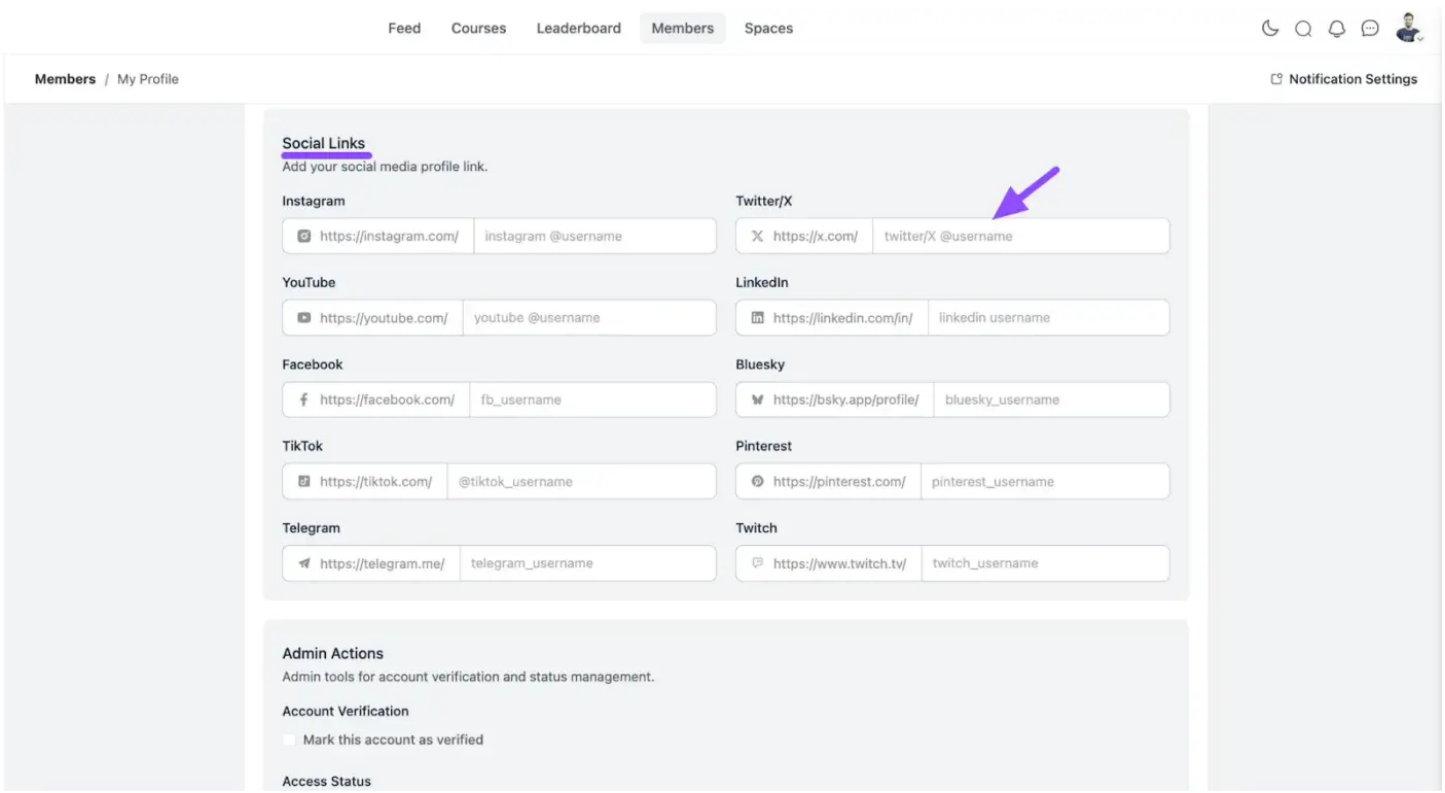

Adding your Social Media Links

Once social links are enabled, users can add their profiles to supported platforms. To add these links, go to your **Profile**. Click the **Add Social Links** button.

Scroll down and select the social media platform where you want to add your profile link. Enter your **username** or **profile URL** for the selected platform.

Once all desired links are added, click the **Save Changes** button.

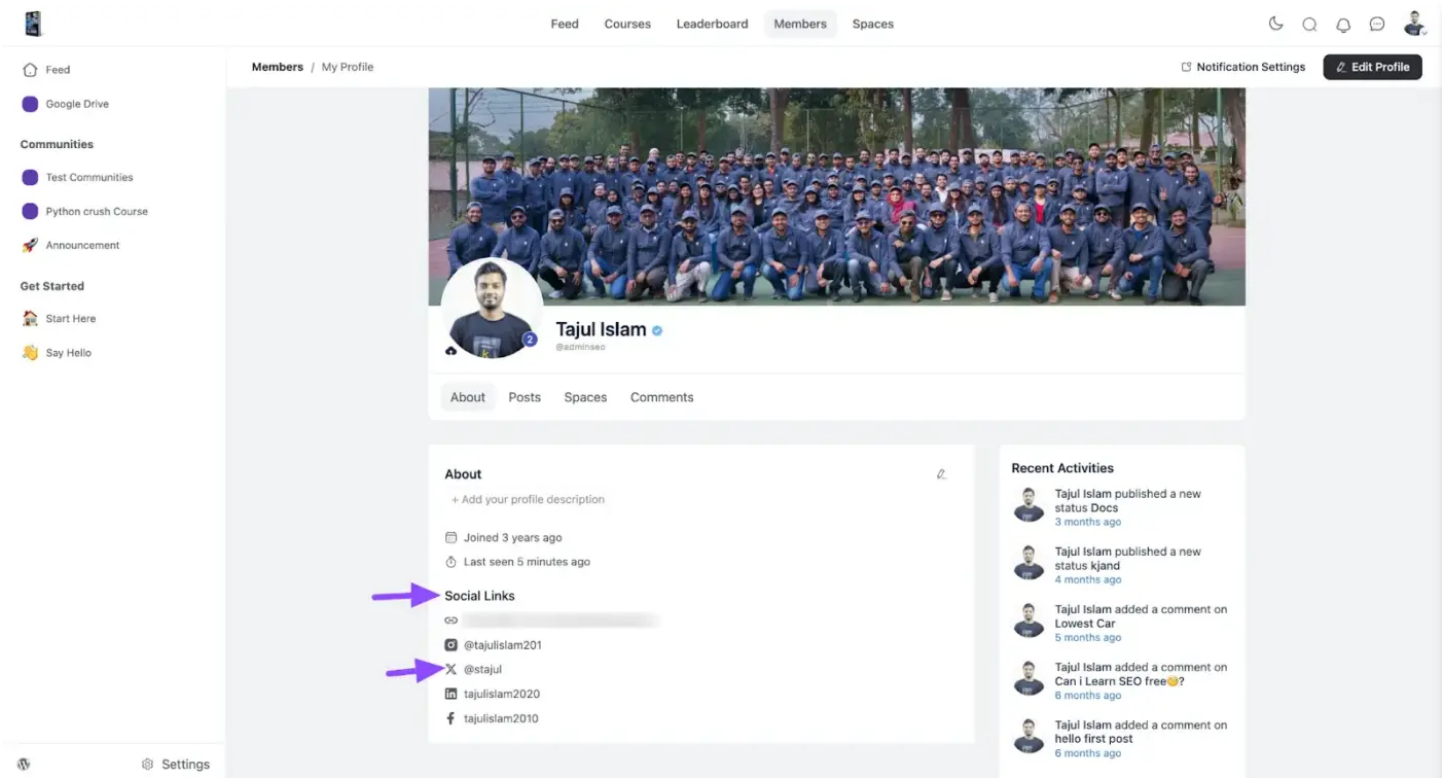

Customizing Social Links

If you want to edit or customize your social links, go to the **Profile’s About** section. Here, you can view your social media links.

Now, locate the **Social Links** dropdown and click the **Social Icon** of the platform you want to customize. Next, modify your username or profile **URL**.

After that, click **Save Changes** to update your social links.

If you have any questions, please don't hesitate to contact our support team. We're here to clarify any confusion and provide solutions to your problems. Thank you.
