Space Group Settings

Administration · https://fluentcommunity.co/docs/space-group-settings/

FluentCommunity allows you to organize your spaces into groups, making it easier to manage and structure your communities.

Create a Space Group

Go to your FluentCommunity. Then, go to **Settings** and select **Space Group** from the left sidebar.

Create a New Group

To create a new group, click the **Create New Group** button. A pop-up will appear asking for the following details:

Group Title: The name of the group.

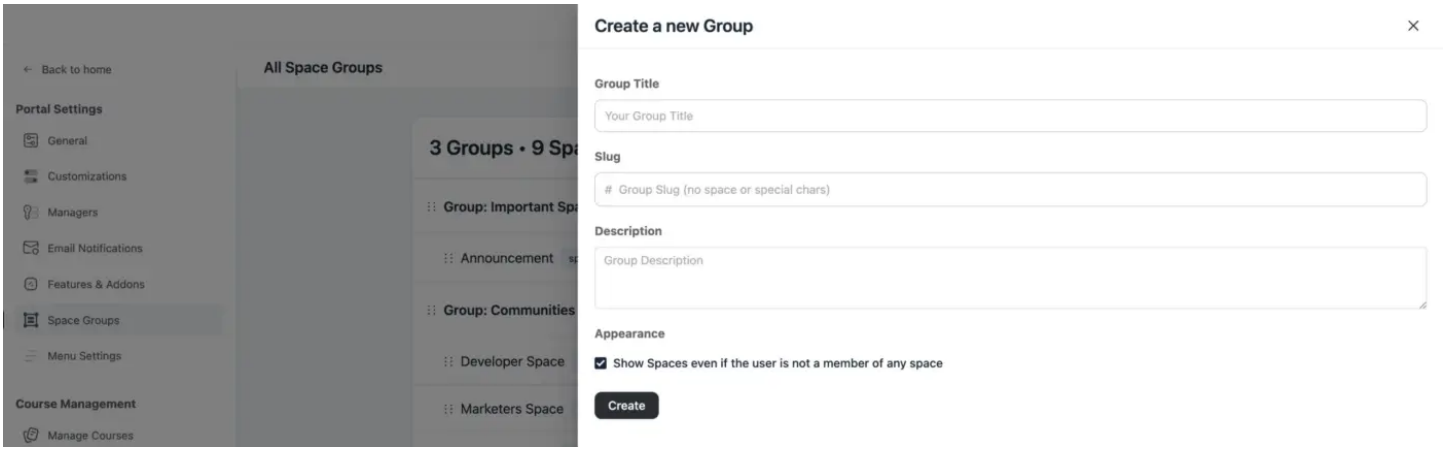

Slug: A URL-friendly version of the group title.

Description: A brief description of the group's purpose.

Set Group Visibility

You can choose the visibility of the group from **Appearance** by selecting the **Show Spaces Even if the User is not a Member of any Space** checkbox.

Once you've filled in the details and set the visibility, click the **Create** button to create the group.

Managing Space Groups

Reorganize Communities: You can easily reorganize the spaces or communities within a group by dragging and dropping them into the desired order.

Edit/Delete Group: To change the details of a group, click the **Edit Info** button next to the group. This will allow you to update the title, slug, description, or visibility settings.

If you want to delete the group simply click on the **Delete** button next to the Group name.

That’s how you can efficiently create and manage your Space Groups to keep your community organized.
