Space Links

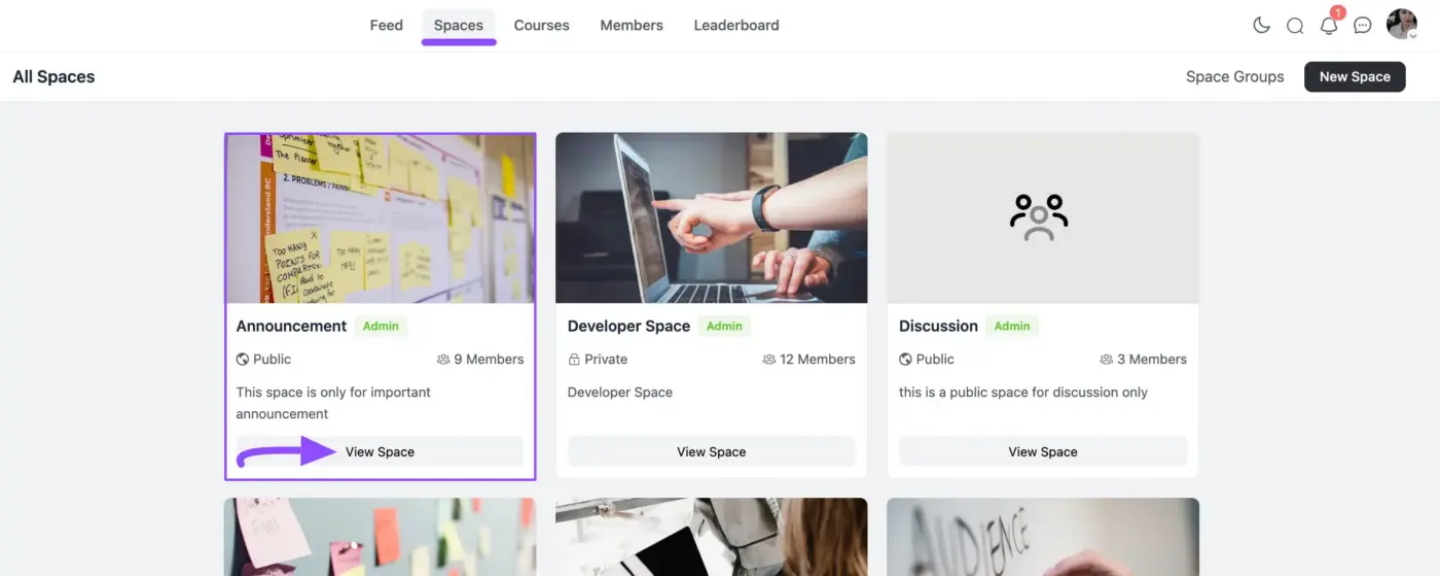

Space Management · https://fluentcommunity.co/docs/space-links/

FluentCommunity allows you to add **Links** to any specific **Space**. This article covers the detailed process of adding the **Links** for **Spaces**.

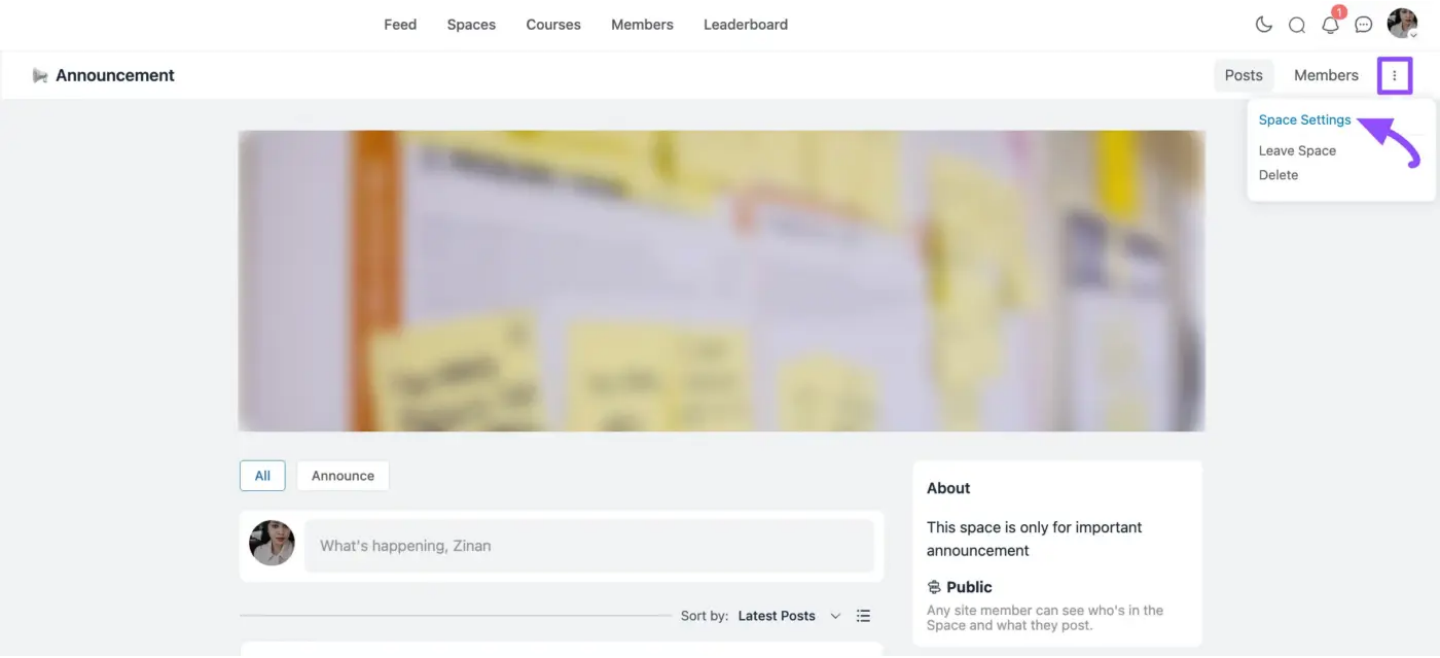

Add Link in a Space

First, go to the **Spaces** section from the **FluentCommunity** navbar and open a **Desired Space** by clicking the **View Space** button where you want to set the **Link**.

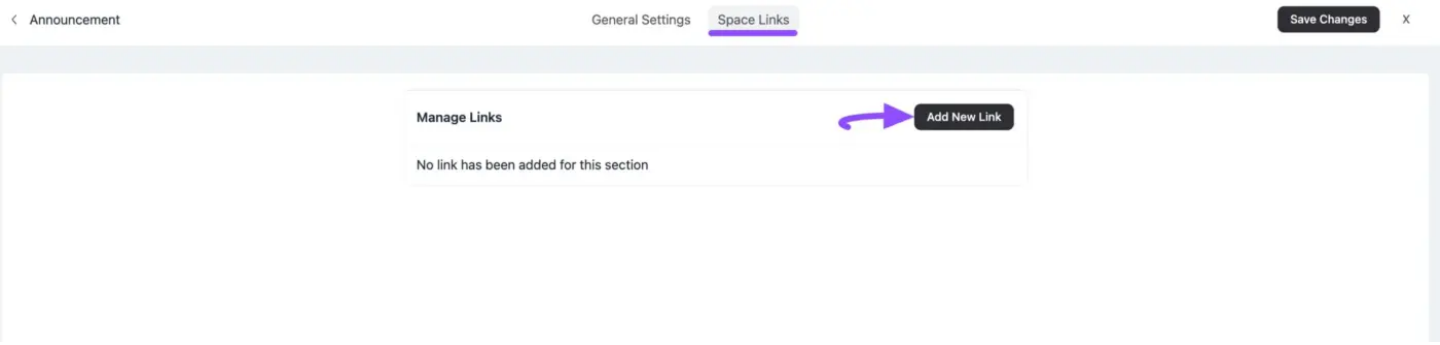

> You can also create a new course by clicking the **New Space** button in the top right corner. To learn the detailed process of creating a **New Space**, read this Documentation.

Go to the **Space Settings** option by clicking the **three-dot** button in the top right corner.

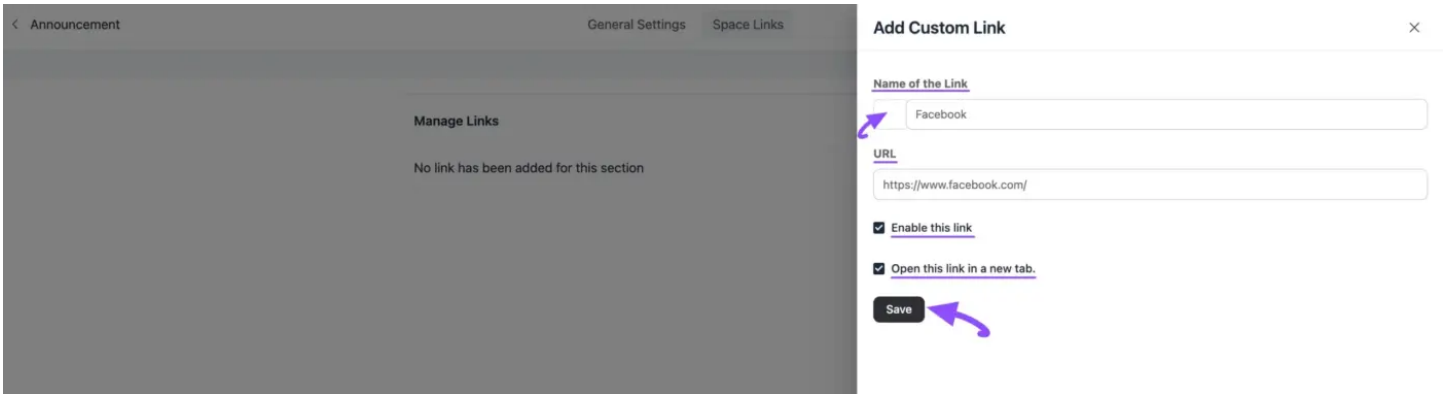

Now, go to the **Space Links** tab and click the **Add New Link** button.

Then, a popup will appear where you should give the necessary information to add a new Link.

Once you are done, click the **Save** button to save all the changes.

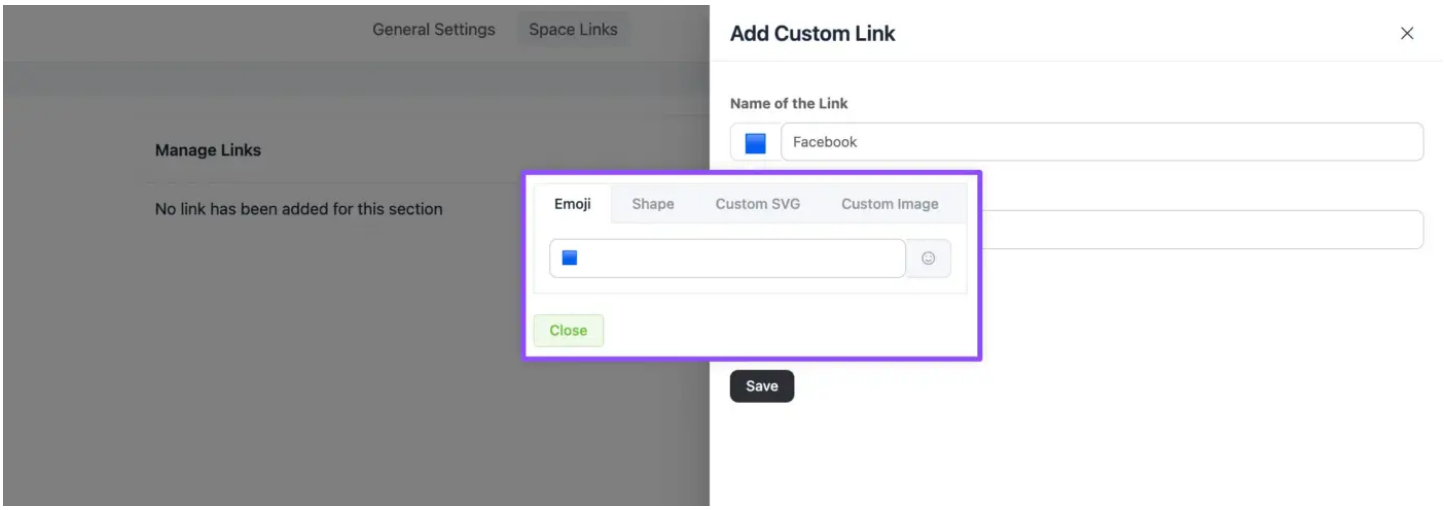

A brief explanation of the options mentioned above is given below –

- **Name of the Link**: Here, type the **name** you want to set for your link.

  Also, you can add an **Icon** beside the **Link Name**. To do this click the **Empty Box** beside the **Name of the Link** field and a popup will appear.

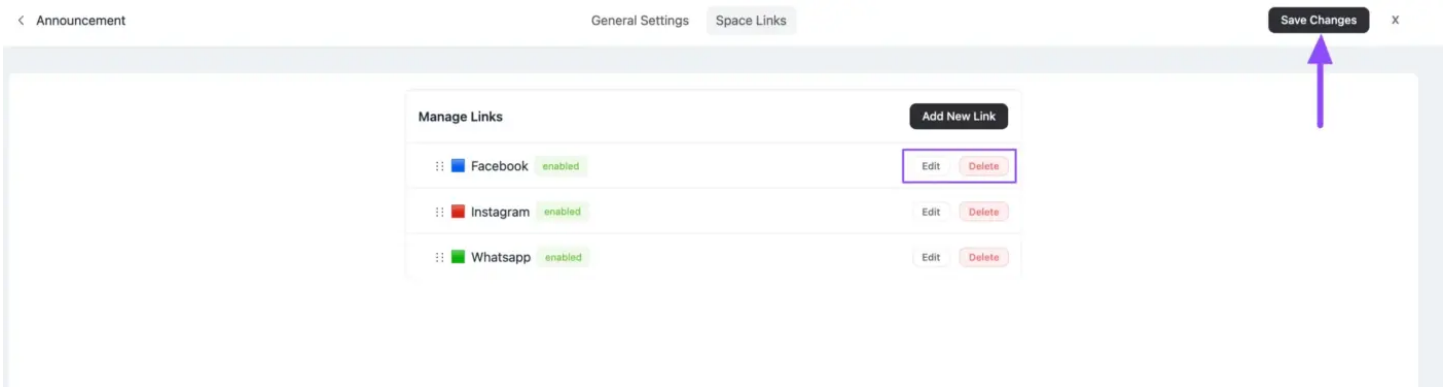

Here, you can set **Emoji**, **Shape**, **Custom SVG**, or **Custom Image** as the **Icon.**

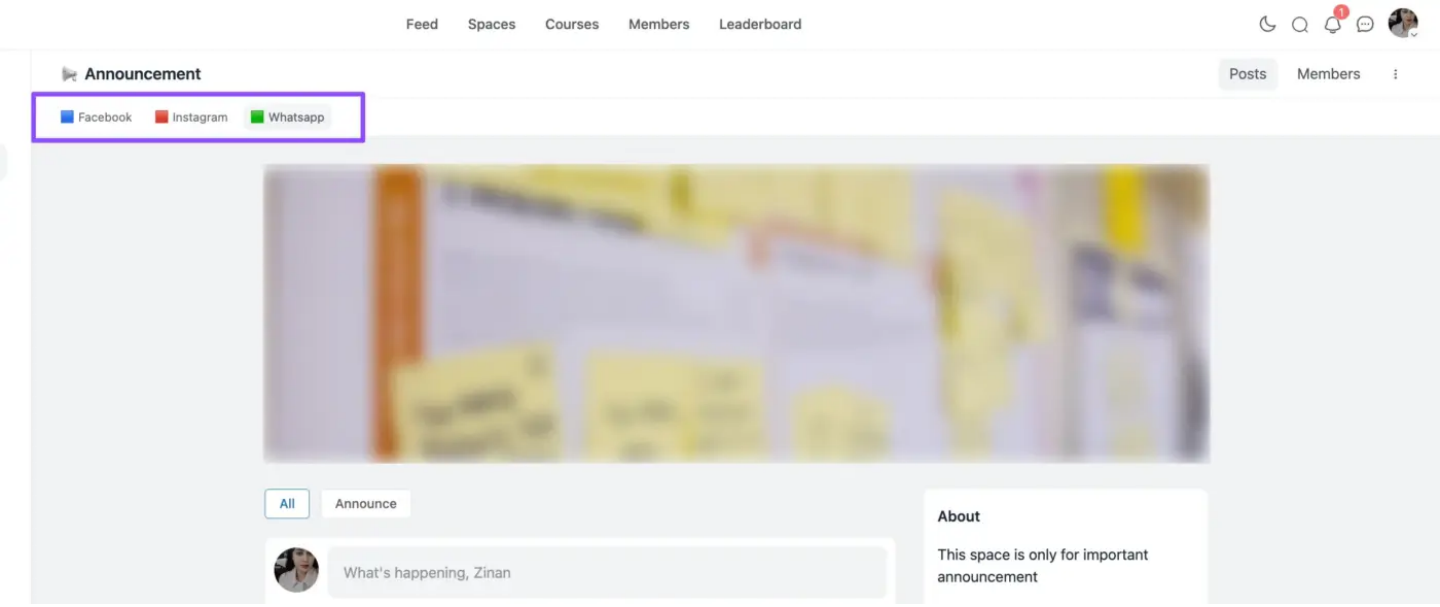

- **URL**: Here, provide the **URL** of the **Link** where you want to redirect users after clicking the link.
- **Enable this Link**: By default, this option is checked (i.e., the link is enabled). If you want to disable the link and keep it as a draft, **Uncheck** the **Box**.
- **Open this link in a new tab**: This one is also checked by default. If you don't want to open the link in a new tab, **Uncheck** the **Box**.

Once you added the **Links**, click the **Save Changes** button and the links will be added to your desired Space.

Also, you can **Edit/Delete** any Link at anytime by clicking the **Edit/Delete** button.

Here, you can see all the **Links** are added in the **Top Navbar** under the chosen **Space**.
